

Introducing LedgerBanking.co – a next-gen digital banking platform, powered by open API's and Blockchain technology

Layering Blockchain technology atop the core banking systems, LedgerBanking creates a robust, yet agile digital platform, allowing banks to disrupt their own business model and offer customers a truly next generation Digital Banking experience

Internal

Connect, Share and Settle

... securely across departmental boundaries and partners using a distributed ledger

Create, Manage and Distribute

... the next generation of smart product and service offerings for the digital era

External

A Single Digital Id

... for unified access to all products and services offered by the bank

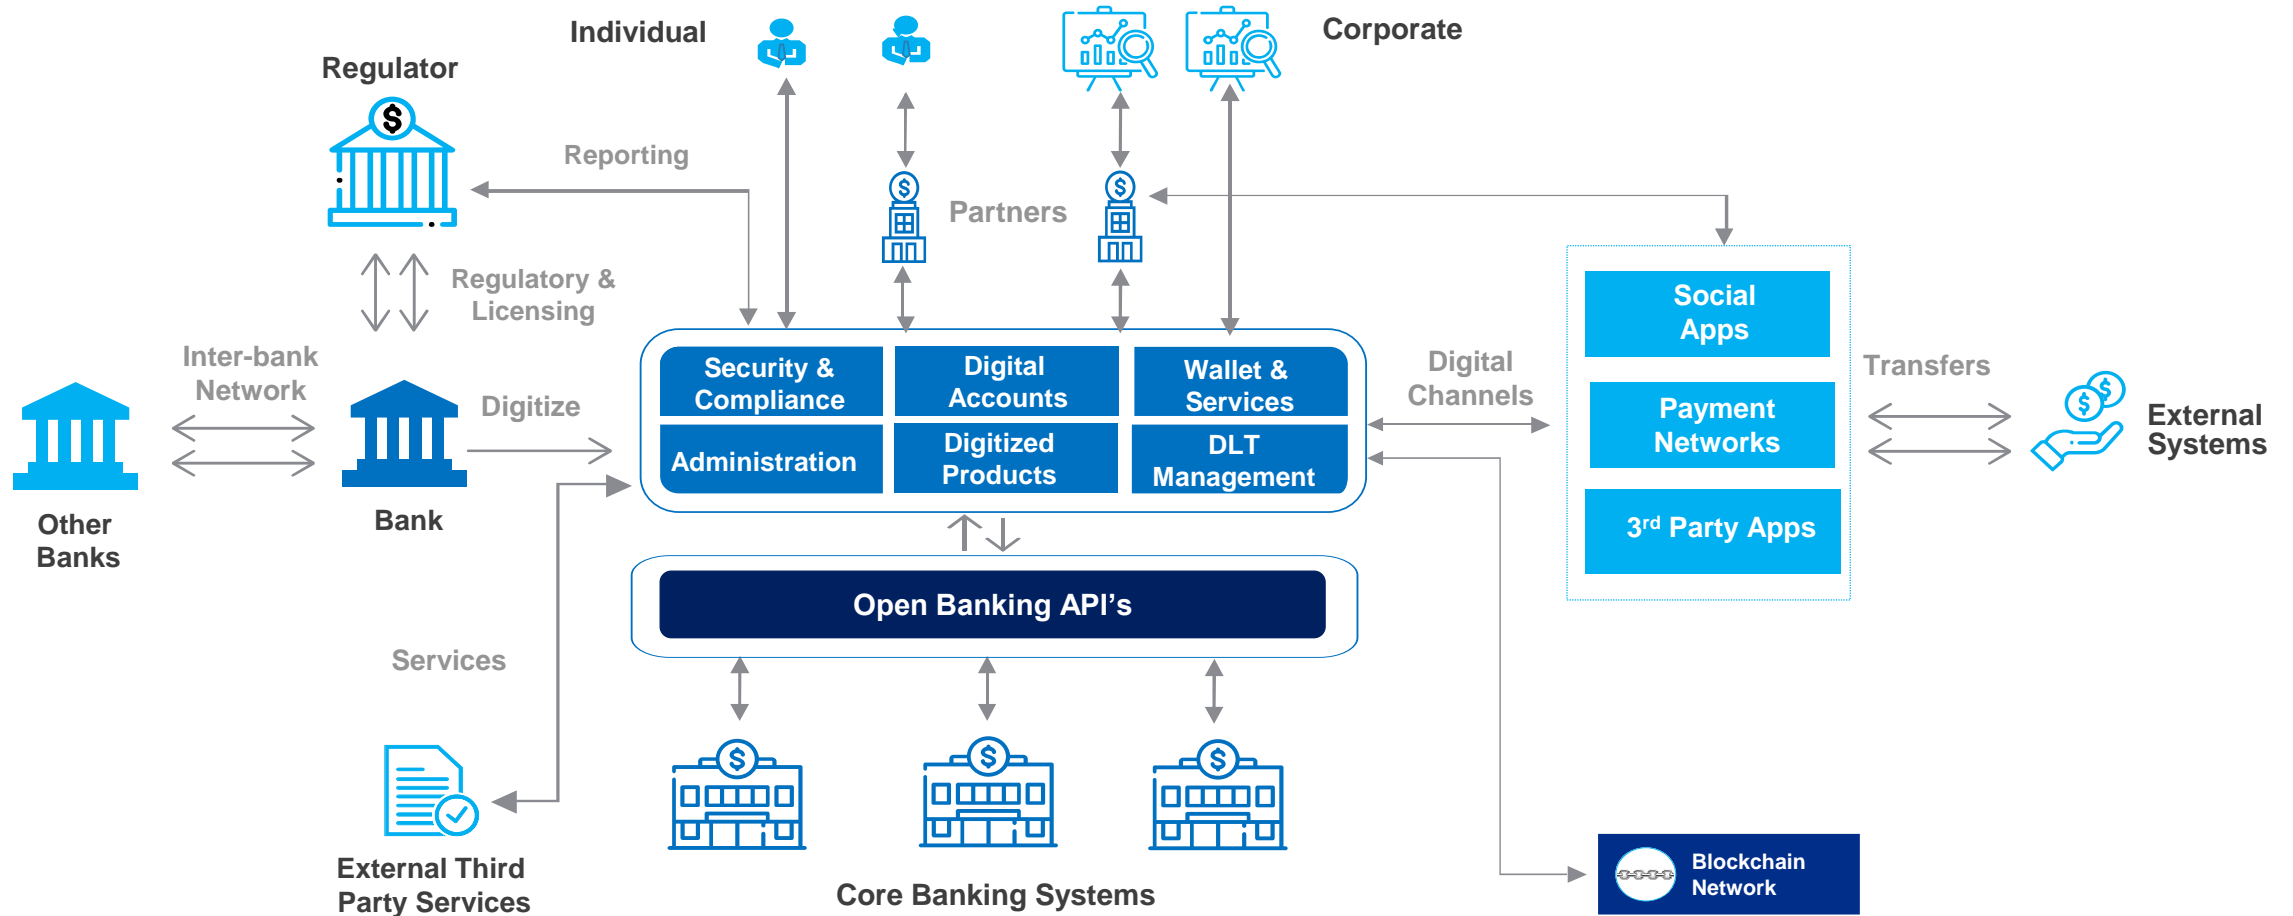

Anytime, anywhere access

... to services across digital channels as well as via integrated partner networks

LedgerBanking offers incumbent traditional banking institutions the same advantages that the Fintech startups and new challenger banks have

Layering a distributed ledger atop core banking systems with open banking API's creates an agile integrated platform to offer truly next generation Digital Banking

How it all comes together

* Subject to regulations

A modular micro services-based infrastructure enables the integration with a host of external systems, creating an ecosystem play and empowers the bank to leverage network effects across multiple channels

The Result: A platform that enables banks to quickly leverage emerging technologies, adapt to changing consumer behaviour and compete in the new digital banking era

A private permissioned distributed ledger
– to connect silo'd units & securely share info across internal department and external partners

A secure and compliant digital platform
– to create, manage and distribute smart product and service offerings for the digital banking era

An institutional-grade digital ecosystem
– with a portfolio of additional digital products & services offered by non-banks partners

Digital identity and unified access
– secure, anytime, anywhere, and available across multiple digital channels

It's time for the next generation of integrated platforms – secure and compliant –to digitally transform banking services.
